WORK EXPERIENCE

UAB Oxylabs

Aug. 2022 – Present

Backend Software Developer (Python)

Vilnius, LT

- One of the market-leading proxy and web scraping service providers.
- As a Software Developer, currently working in the research and development team, where I explore and introduce new ways to improve scraping success rate or reduce network traffic.
- Before joining the R & D team, I worked on the main scraping infrastructure team, reducing technical debt, taking care of new product features, antibot reverse engineering and general maintenance.
 - Designed multiple medium sized features that helped save on internet traffic and increased scraping infrastructure success rate.
 - Moved to the Research and Development team to utilize my exploratory interests and focus more on improvements rather than maintenance.
 - Actively share new ideas with the team, participate in internal hackathons and guild meetings.
- Mentorship: As an experienced developer I mentor new hires during their first months. Introduce them to our system, processes and team guidelines.
- Communicated with clients when more technical details and explanations were required.

LTG Link

Oct. 2020 – Aug. 2022

Data analyst and team lead

Vilnius, Remote

- Lead the digital revolution within the company, moving from paper to digital platforms.
 - Created mobile app within Microsoft Power Platform (SharePoint, PowerApps, Power Automate) to replace paper forms for train maintenance workers.
 - Automate and visualize real time data and analytics using Python and PowerBI.
- Took responsibility for a small team of 5 data analysts.
- Awarded as Employee of the Year for initiatives, execution and participation within the company (hackathons, hosted seminars and other events).

EDUCATION

Middlesex University

Graduation May, 2020

Bachelor of Science, Computer Science

London, UK

- First Class Honours (1st).
- Played in local amateur american football team for 2 years, won Offensive Player of the Year award.
- Financially supported myself working various part-time jobs throughout my studies.
